

You know, I think you guys have a war to fight in Iraq that is more important than this little petty complaint from whiners known collectively as the NAB. Win the war on terror and leave entrepreneurs alone as they attempt to do something that is making the broadcast industry better and more competitive. I am an XM subscriber. I do not listen to the Traffic and Weather all the time. However, it is a valuable service for long trips when I travel to the other areas of the country and take my portable radio and find out how roads go and weather is for preparation of my trip.
